

THIS IS A WORLD PATENTED PRODUCT.

## Award winning solution

Participated in the International Invention Exhibition Competition.  
Won the highest trophy "Platinum Award"

THE CLEAN SOLUTION

## Why do electric drills need a dust collector

1. Because the drill spreads the drilling dust when drilling. This serious harms the health of the drill user. Causes fear among the drill users.
2. Dust collectors reduce the breakdown of electric drills.
3. Dust collectors reduces the cleaning effort.

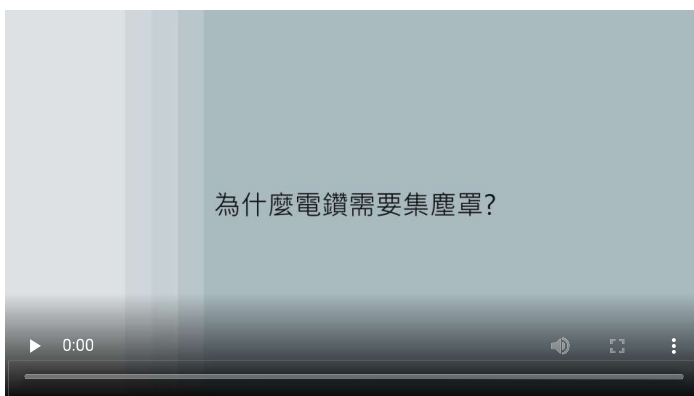

So the drill needs a dust collector.

BENEFITS

## The invention of the dust collector is the trend of the times

Because of humanity in the 21st century. Pursue health, environmental protection and cleanness of home environment. Therefore, the invention of dust collector conforms to the pursuit of human beings.

Easy to use      Customer Friendly      clean solution

FOR YOUR SUCCESS

## If you want the drill to sell well, think of a drill dust collector.

1. Because the dust collector is 100% effective in collecting dust.
2. The dust collector is light and beautiful in appearance and simple in operation.
3. Large and small electric drills of various brands can be used.
